TRAFFIC SAFETY PROGRAM WITH PLUS: EDUCATING YOUNG ROAD USERS

Az-Zahra School recently collaborated with PLUS Malaysia Berhad to conduct a Traffic Safety Awareness Program aimed at educating students on the importance of being safe and responsible road users. The program was part of the school's ongoing effort to instill good habits and awareness from a young age.

During the session, representatives from PLUS engaged students through interactive talks, videos, and quizzes focusing on key topics such as pedestrian safety, seatbelt usage, and road signs. The presenters also shared real-life stories and practical tips to help students understand how small actions — like crossing the road carefully or wearing a seatbelt — can save lives.

Students were enthusiastic participants, eagerly answering questions and demonstrating what they learned through fun role-play activities. The session not only strengthened their understanding of traffic rules but also encouraged them to act as “Junior Road Safety Ambassadors” within their families and communities.

Az-Zahra School expresses its sincere appreciation to PLUS Malaysia Berhad for their time, commitment, and meaningful contribution toward shaping a generation that values safety, discipline, and civic responsibility.

OUR OCEANS IN CRISIS

RIISING SEA TEMPERATURES

Global warming is causing sea temperatures to rise, leading to coral bleaching and the destruction of vital marine habitats. Over 50% of the world's coral reefs have already been affected.

WHAT CAN WE DO?

Protecting our oceans requires global action. Reduce your carbon footprint, support marine conservation efforts, and advocate for stronger climate policies.

OCEAN ACIDIFICATION

Increased CO2 levels are making our oceans more acidic, harming shellfish, plankton, and other essential marine species. This disrupts the entire marine food chain.

ACTION POINTS:

- Reduce plastic use to keep our oceans clean.
- Support sustainable seafood choices.
- Participate in local beach cleanups.

THREATENED MARINE SPECIES

Species like sea turtles, fish, and marine mammals are struggling to adapt to rapidly changing conditions. Many are facing reduced habitats and food sources.
